IT Risk Management: DataPower Mentoring

Client:

IT Risk Management Firm

The Project:

With our recognized industry expertise, iSOA Group consultants are often called upon to mentor client engineers on DataPower implementation. For this project, iSOA Group provided mentoring for architectural review, DataPower discussions, and general DataPower Q&A sessions for DataPower team engineers.

Solutions Details:

- Inspect the DataPower configuration F
- Share the best practices on WS-Proxy, firewall configurations, security and transformations on DataPower
- Discuss different architectures possible with DataPower and suggest the best case scenario for the company
- Provide guidance on DataPower administration and configuration

Technologies:

WebSphere Application Server 6.x, DataPower XI50, SoapUI for Client, WebSphere Message Broker, WebSphere MQ, Firewalls.
