

Are You Mobile Ready?

The iSOA accelerated & Secured Mobile Life Cycle

Assess: Mobile Readiness

- Assess Your Mobile Business Strategy
- Review your infrastructure and security requirements.
- Validate your current mobile user experience for your customers, employees or partners.

The assessment team is focused on assuring you have a baseline of your current mobile environment delivering documented assessment of current and future requirements.

StandUP Deployment: Implementation Services

StandUP Implementation is about implementing the right solution that will assure your company achieves its mobile business objectives as agreed to from the Assessment Phase.

We will recommend, and assist your company in deploying the right solution that will support the mobile application strategy. This will assure you have a completely integrated solution that can support the dynamics and environment for your mobile solution.

Operational Excellence: Certified iSOA resources

We will assist your technical team in assuring the right procedures are in place to operate your mobile environment. That includes have the correct monitoring, reporting procedures and security required compliance.

Our resource will be a certified iSOA resource that works at your location to ensure proper administration and configuration of your environment.

Accelerate, Integrate, Extend and Secure

We know Mobile Success doesn't start and end with a SmartPhone App!

StandUp Mobile Lifecycle Implementation Details

iSOA is your IBM Premier Mobile Business Partner, with skills to help you StandUP and Deploy the IBM Mobile Foundation Solution which includes IBM Worklight, WebSphere Cast Iron, and Tivoli's EndPoint manager to develop, deploy and manage your mobil environment

Integrate Mobile with your CRM or ERP Business Applications

- With Worklight Adapters and Cast Iron we will show you how to integrate your mobile app with:
