

Assured Security and Integration!

The iSOA DataPower Lifecycle Offering

Assessment:

Documented Plan for Success

Match your DataPower deployment or purchase with your business requirements for integration, security, and networking requirements and how DataPower's capabilities can be leveraged for your environment.

The iSOA Group, Inc. team will work with you and your organization to create a clear plan from deployment, development, to operations to assure your success.

StandUP Deployment:

Implementation Services

iSOA Certified DataPower professionals will assist you in deploying key DataPower functionality required for your organization using our proven patterns of DataPower deployment.

Our consultants will assist with integration of back-end services, such as WebSphere MQ, web services, and mainframes, and will provide guidance using our DataPower patterns to help implement your solution while providing knowledge transfer to your staff.

Operational Excellence:

Certified iSOA resources

Assuring your day to day operation of your DataPower Appliances is delivering the value you require in a reliable environment.

iSOA Group consultants can assure your team has processes and skills in place to day operate and maintain your DataPower appliances including the correct run time and operational documentation.

Whether You Have DataPower Appliances or are evaluating them for your environment, the iSOA DataPower Lifecycle offering can help assure the best solution and ROI for your company's investment!
