

Enterprise Class Integration!

The iSOA MQ and Message Broker Lifecycle Offering

The iSOA team is here to assist you in developing an Enterprise class integration strategy whether You Have WebSphere MQ and Message Broker or not!

Assessment:

Documented Plan for Success

If you have IBM's WebSphere MQ Software and Message Broker, you have the tools for an Enterprise class solution for integration across any platform, application, or device.

To gain the most business value (and ROI) whether you are a new customer or a long term WebSphere customer, the iSOA team can help you assess your overall integration strategy and the best approach to leverage WebSphere solutions.

Your Assessment will help document your business requirements, enterprise integration strategy, requirements, and potential technology solutions to support your company into the future.

StandUP Deployment: Implementation Services

iSOA Certified WebSphere MQ and Message Broker professionals will assist you in deploying key functionality required for your organization using our proven patterns of success with integration solutions deployment.

Our consultants will assist with integration of back-end applications and services. We will provide guidance to help implement your solution while providing knowledge transfer to your staff.

Operational Excellence: Certified iSOA resources

Gaining real value from your solution comes with operational excellence with WebSphere and the iSOA team can assist with day to day support.
